

Circle Top Pins

ERO-TEX circle top pins can be used to secure erosion control blankets, turf reinforcement mats, geotextiles, netting and sod.

The pins are made from 11 gauge steel wire and have a beveled edge. Each pin measures 6 inches in length and has a 1 3/8" diameter head on top.

ERO-TEX circle top head can hold up to 5 times the surface area of a typical U-shaped staple.

Options: 6" x 11 gauge 1000/carton 33lbs.
60 cases per skid.

Installation: Circle Top Pounder assists your crew and reduces bending over when installing pins. The magnetic head centers the Circle top pin each time.
